

*Functional Requirements***Conclusions/Intentions**

In order to evaluate the available technology (hardware) that will be necessary for supporting the functional requirements (software applications), the following conclusions and intentions are presented.

- ◆ **All applications and software packages will be usable in any classroom setting.**
- ◆ **Each application and software package will be customizable in that the faculty and students will be able to re-use the application or package for various projects.**
- ◆ **Each application and software package will be available on any school-based computer for easy exchange of document files.**
- ◆ **Each tool application and software package will be networkable for document sharing.**
- ◆ **Each tool application and software package will easily incorporate outside resource material and Internet media.**
- ◆ **All St. Margaret's faculty and students will be encouraged to standardize all functional word-processing, presentations, spreadsheets, and data base management needs within Microsoft Office.**
- ◆ **All student applications will compliment the new Baltimore Archdiocese technology curriculum.**
